Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 March 2003.

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

Claims 13-20 are objected to because of the following informalities:

The limitation of the thickness of the silicon carbide layer is in claim 15; hence, the correct claim to be cancelled should be claim 15, not claim 14 as applicants have done. Appropriate correction is required.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-8, 10-13, 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art and Xing – US 6,492,222.

See reasons of record in paper 2, January 30, 2003.

Applicant's arguments filed on March 28, 2003 have been fully considered but they are not persuasive.

Applicants have stated in the response at the bottom of page 3 to the top of page 4 that a thin silicon carbide layer is formed on at least one layer of the plurality of the inter-layer

dielectrics. Xing clearly discloses (see especially col. 7, lines 59-64) to form a thin dielectric layer, which may be silicon carbide, between the interlayer dielectric layers. Although applicant is correct in stating that interlayer dielectrics are on the order of thousands of angstroms thick, Xing teaches a thin dielectric layer between the interlayer dielectric layers. The thickness may be optimized depending on the level of protection necessary for the memory device. It is reasonable that the thickness of the thin dielectric layer be in the hundreds of angstroms (and not in the thousands of angstroms). Note that in col. 9, lines 54-55, Xing states, as an example, that thin films may be less than 100 nm thick (less than 1000 angstroms).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
